

NetGuard® Plus Cyber Liability Insurance

SHORT FORM RENEWAL APPLICATION

THIS IS AN APPLICATION FOR A CLAIMS MADE AND REPORTED POLICY. THIS APPLICATION IS NOT A BINDER.

This application for NetGuard® Plus Cyber Liability Insurance is intended to be used for the preliminary evaluation of a submission. When completed in its entirety, this application will enable the Underwriter to decide whether or not to authorize the binding of insurance. Please type or print clearly and answer all questions. If space is insufficient to answer any question fully, attach a separate sheet. Complete all required supplemental forms/applications. "You" and "Your", as used in this application, means the Applicant.

Please refer to the attached Cyber Glossary for an explanation of the cyber security terms that appear in bold face type.

1. GENERAL INFORMATION							
Name of Applicant:							
Street Address:							
City, State, Zip: Phone:							
Website: Fax:							
Applicant is a(an):							
2.	RE	QUIRED ADDITIONAL I	INFORMATION				
	a.	a. Total number of employees:					
	 b. Has the name of the Applicant changed, or has any merger or consolidation taken place, in the past 12 months? If "Yes", provide details on a separate page. 						
	C.	Have there been any m	naterial changes in the Applicant's security	controls in the past 12 months?	☐ Yes ☐ No		
		If "Yes", provide details on a separate page.					
	d.		uired any subsidiaries, affiliated companies		☐ Yes ☐ No		
		company or entity, (2) i		erations of each such subsidiary, affiliated percentage of ownership by the Applicant.			
3.	RE	VENUES					
			<u>Current</u> Fiscal Year ending /	<u>Last</u> Fiscal Year ending /			
			(current projected)	ending /			
Tota	al gro	ess revenues:	\$	\$			
4.	RE	CORDS					
	 a. Do you collect, store, host, process, control, use or share any private or sensitive information* in either paper or electronic form? If "Yes", provide the approximate number of unique records: Paper records: Electronic records: *Private or sensitive information includes any information or data that can be used to uniquely identify a person, including, but not limited to, social security numbers or other government identification numbers, payment card 				☐ Yes ☐ No		
	b.	fingerprints, voiceprints, facial, hand, iris or retinal scans, DNA, or any other biological, physical or behavioral characteristics that can be used to uniquely identify a person?					
		If "Yes", have you reviewed your policies relating to the collection, storage and destruction of such information or data with a qualified attorney and confirmed compliance with applicable federal, state, local and foreign laws?					
	C.	Do you process, store of if "Yes", are you PCI-D	or handle credit card transactions? SS Compliant?		☐ Yes ☐ No ☐ Yes ☐ No		
5.		DEPARTMENT					
			leted by the individual within the Applicant fers only to such individual.	's organization who is responsible for networ	security. As used		
	a.V	Vithin the Applicant's org	ganization, who is responsible for network	security?			
		Name:					
	Title:						
	Phone: Email address:						
	IT Security Designation(s):						
tmho	c.co	m/cyber					

NGP-SRNA (11.2021) Page **1** of **4**

	b.	The Applicant's network security is: Outsourced; provide the name of your network security provider:				
		☐ Managed internally/in-house				
	C.	If the Applicant's network security is outsourced, are you the main contact for the network security provider named in question b. above? If "No", provide the name and email address for the main contact:	☐ Yes ☐ No			
	d.	How many IT personnel are on your team?				
	e.	How many dedicated IT security personnel are on your team?				
coi Ap	By signing below, you confirm that you have reviewed all questions in Sections 6 through 8 of this application regarding the Applicant's security controls, and, to the best of your knowledge, all answers are complete and accurate. Additionally, you consent to receiving direct communications from the Insurer and/or its representatives regarding potentially urgent security issues identified in relation to the Applicant's organization.					
		pe Name:				
	gnatu					
6.	INF	FORMATION AND NETWORK SECURITY CONTROLS				
	a.	Do you use a cloud provider to store data or host applications? If "Yes", provide the name of the cloud provider: If you use more than one cloud provider to store data, specify the cloud provider storing the largest quantity of	Yes No			
		sensitive customer and/or employee records (e.g., medical records, personal health information, social security numbers, bank account details and credit card numbers) for you.				
	b.	Do you use Multi-Factor Authentication (MFA) to secure all cloud provider services that you utilize (e.g. Amazon Web Services (AWS), Microsoft Azure, Google Cloud)?	☐ Yes ☐ No			
	C.	Do you encrypt all sensitive and confidential information stored on your organization's systems and networks? If "No", are the following compensating controls in place:	☐ Yes ☐ No			
		(1) Segregation of servers that store sensitive and confidential information?	☐ Yes ☐ No			
		(2) Access control with role-based assignments?	☐ Yes ☐ No			
7.	RA	NSOMWARE CONTROLS				
	a.	Do you pre-screen emails for potentially malicious attachments and links? If "Yes", complete the following:	☐ Yes ☐ No			
		(1) Select your email security provider: Choose an item.				
		If "Other", provide the name of your email security provider:				
		(2) Do you have the capability to automatically detonate and evaluate attachments in a sandbox to determine if they are malicious prior to delivery to the end-user?	Yes No			
	b.	Can your users access email through a web application or a non-corporate device? If "Yes", do you enforce MFA?	Yes No Yes No Yes No			
	C.	Do you allow remote access to your network? If "Yes", do you use MFA to secure all remote access to your network, including any remote desktop protocol (RDP) connections?				
		If MFA is used, complete the following: (1) Select your MFA provider: Choose an item. If "Other", provide the name of your MFA provider:				
		(2) Select your MFA type: Choose an item. If "Other", describe your MFA type:				
		(3) Does your MFA configuration ensure that the compromise of a single device will only compromise a single authenticator?	☐ Yes ☐ No			
	d.	Do you use a next-generation antivirus (NGAV) product to protect all endpoints across your enterprise?	☐ Yes ☐ No			
		If "Yes", select your NGAV provider: Choose an item.				
		If "Other", provide the name of your NGAV provider:				
	e.	Do you use an endpoint detection and response (EDR) tool that includes centralized monitoring and logging of all endpoint activity across your enterprise?	☐ Yes ☐ No			
		If "Yes", complete the following:				
		(1) Select your EDR provider: Choose an item.				
		If "Other", provide the name of your EDR provider: (2) Do you enforce application whitelisting (blocklisting)				
		(2) Do you enforce application whitelisting/blacklisting?	Yes No			
		(3) Is EDR deployed on 100% of endpoints?	☐ Yes ☐ No			

NGP-SRNA (11.2021) Page **2** of **4**

tmhcc.com/cyber

	If "No", please use the Additional Comments section to outline which assets do not have EDR, and				
		(4)	whether any mitigating safeguards are in place for such assets.	☐ Yes ☐ No	
		(4)	Can users access the network with their own device ("Bring Your Own Device")?	Yes No	
			If "Yes", is EDR required to be installed on these devices?		
	f.		you use MFA to protect all local and remote access to privileged user accounts?	☐ Yes ☐ No	
			'es", select your MFA type: Choose an item.		
			Other", describe your MFA type:	Yes No	
	g.		Oo you use a data backup solution?		
	If "Yes":				
	(1) Which best describes your data backup solution?				
			Backups are kept locally but separate from your network (offline/air-gapped backup solution).		
			Backups are kept in a dedicated cloud backup service.		
			You use a cloud-syncing service (e.g. Dropbox, OneDrive, SharePoint, Google Drive).		
			Other (describe your data backup solution):		
	(2) Check all that apply:				
			☐ Your backups are encrypted.		
			You have immutable backups.		
			☐ Your backups are secured with different access credentials from other administrator credentials.		
			You utilize MFA for both internal and external access to your backups.		
	You have tested the successful restoration and recovery of key server configurations and data from backups in the last 6 months.				
			You are able to test the integrity of backups prior to restoration to ensure that they are free of malware.		
		(3)	How frequently are backups run? ☐ Daily ☐ Weekly ☐ Monthly		
		(4)	Estimated amount of time it will take to restore essential functions using backups in the event of a		
			widespread malware or ransomware attack within your network?		
			☐ 0-24 hours ☐ 1-3 days ☐ 4-6 days ☐ 1 week or longer		
			COMMENTS (Use this space to explain any "No" answers in the above section and/or to list other re	elevant IT security	
mea	sure	s you	are utilizing that are not listed here.)		
8.	PH	ISHII	NG CONTROLS		
	a.				
			ning?	Yes No	
	If "Yes", does such training include phishing simulation?			Yes No	
	b.				
		(1)	'es", does your wire transfer authorization process include the following:		
			A wire request documentation form?	☐ Yes ☐ No	
		(2)	A wire request documentation form? A protocol for obtaining proper written authorization for wire transfers?	☐ Yes ☐ No ☐ Yes ☐ No	
		(2)	A wire request documentation form? A protocol for obtaining proper written authorization for wire transfers? A separation of authority protocol?	☐ Yes ☐ No

California Fraud Warning

For your protection, California law requires the following to appear on this form: Any person who knowingly presents false or fraudulent information to obtain or amend insurance coverage or to make a claim for the payment of a loss is guilty of a crime and may be subject to fines and confinement in state prison.

Cyber Glossary

The following Cyber Glossary is provided to assist you in completing your application correctly and completely.

DomainKeys Identified Mail (DKIM) is an email authentication method that allows senders to associate a domain name with an email message, thus vouching for its authenticity. A sender creates the DKIM by "signing" the email with a digital signature. This "signature" is located in the message's header.

Domain-based Message Authentication, Reporting & Conformance (DMARC) is an email authentication protocol that uses Sender Policy Framework (SPF) and DKIM to determine the authenticity of an email message.

Endpoint application isolation and containment technology is a form of zero-trust endpoint security. Instead of detecting or reacting to threats, it enforces controls that block and restrain harmful actions to prevent compromise. Application containment is used to block harmful file and memory actions to other apps and the endpoint. Application isolation is used to prevent other endpoint processes from altering or stealing from an isolated app or resources.

Common Providers: Authentic8 Silo; BitDefender™ Browser Isolation; CylancePROTECT; Menlo Security Isolation Platform; Symantec Web Security Service

Endpoint Detection and Response (EDR), also known as endpoint *threat* detection and response, centrally collects and analyzes comprehensive endpoint data across your entire organization to provide a full picture of potential threats.

Common Providers: Carbon Black Cloud; Crowdstrike Falcon Insight; SentinelOne; Windows Defender Endpoint

Immutable backups are backup files that are fixed, unchangeable, and can be deployed to production servers immediately in case of ransomware attacks or other data loss.

Multi-Factor Authentication (MFA) is an electronic authentication method in which a computer user is granted access to a website or application only after successfully presenting two or more pieces of evidence to an authentication mechanism: knowledge (e.g., password), possession (e.g., phone or key), and inherence (e.g., FaceID or hand print). MFA for remote email access can be enabled through most email providers.

Common MFA providers for remote network access:

Okta; Duo; LastPass; OneLogin; and Auth0.

Next-Generation Anti-Virus (NGAV) is software that uses predictive analytics driven by machine learning and artificial intelligence and combines with threat intelligence to detect and prevent malware and fileless non-malware attacks, identify malicious behavior, and respond to new and emerging threats that previously went undetected. For purposes of completing this application, NGAV refers to anti-virus protection that focuses on detecting and preventing malware on each individual endpoint. If your organization has a NGAV solution **AND** you are centrally monitoring and analyzing all endpoint activity, please indicate that you have NGAV & EDR on the application.

Common Providers: BitDefender™; Carbon Black; CrowdStrike Falcon Prevent; SentinelOne; Sophos; Symantec

Offline/Air-gapped backup solution refers to a backup and recovery solution in which one copy of your organization's data is offline (i.e., disconnected) and cannot be accessed. If a file or system of files has no connection to the internet or a LAN, it can't be remotely hacked or corrupted.

Cyber Glossary

Powershell is a cross-platform task automation and configuration management framework from Microsoft, consisting of a command-line shell and scripting language. It is used by IT departments to run tasks on multiple computers in an efficient manner. For example, Powershell can be used to install a new application across your organization.

Privileged Account Management Software (PAM) is software that allows you to secure your privileged credentials in a centralized, secure vault (i.e., a password safe). To qualify as PAM, a product must allow administrators to create privileged access accounts; offer a secure vault to store privileged credentials; and monitor and log user actions while using privileged accounts.

Common Providers: CyberArk and BeyondTrust.

Protective DNS Service (PDNS) refers to a service that provides Domain Name Service (DNS) protection (also known as DNS filtering) by blacklisting dangerous sites and filtering out unwanted content. It can also help to detect & prevent malware that uses DNS tunneling to communicate with a command and control server.

Common Providers: Zscaler; Quad9; OpenDNS; and public sector PDNS.

Remote Desktop Protocol (RDP) connections is a proprietary protocol developed by Microsoft which provides a user with a graphical interface to connect to another computer over a network connection. The Microsoft RDP provides remote display and input capabilities over network connections for Windows-based applications running on a server.

Security Information and Event Management system (SIEM) is a subsection within the field of computer security, wherein software products and services combine security information management and security event management. SIEM provides real-time analysis of security alerts generated by applications and network hardware.

Security Operations Center (SOC) is a centralized unit that deals with security issues on an organizational and technical level.

Sender Policy Framework (SPF) is an email authentication technique used to prevent spammers from sending messages on behalf of your domain. With SPF, your organization can publish authorized mail servers.

Vulnerability management tool is a cloud service that gives you instantaneous, global visibility into where your IT systems might be vulnerable to the latest internet threats and how to protect against them. The tool is an ongoing process that includes proactive asset discovery, continuous monitoring, mitigation, remediation and defense tactics to protect your organization's modern IT attack surface from cyber threats.

Common Providers: Qualys; InsightVM by Rapid7; and Nessus® by Tenable™
