# 2020 COVID-19 Claims Data

COVID-19 is a generational event that has significantly impacted our daily lives. From a stop loss perspective, COVID-19 is both a new diagnosis and potential claim expense that was not previously expected. Tokio Marine HCC – Stop Loss Group (TMHCC) is sharing their data on COVID-19 to keep their customers and partners better informed on its impact. The claims data provided below is based on claims paid by the employer's medical plan for which TMHCC has received either a notice or a claim reimbursement request. This data represents lives covered by self-funded plans where the primary diagnosis is COVID-19 or COVID-19-related. Please reach out to your local TMHCC marketing representative with questions.

Government	25 Claims	Meat Packing	16 Claims
Management Services	16 Claims	Executive Offices	16 Claims
Engineering Services	12 Claims	Motor Vehicle Dealerships	10 Claims
Specialty Outpatient	11 Claims	Motors & Generators	12 Claims
Electrical Work	11 Claims	Business Services	9 Claims
Grocery	8 Claims	Highway & Street Construction	8 Claims

While frontline industries were impacted the highest with a greater number of COVID-19 or COVID-19 related claims, we were unable to isolate frontline from remote capable workers in our statistics. However, based on our analysis, we discovered that the overall frequency of COVID-19 claims relative to the number of employees was very consistent across all industries.
