

NetGuard® Plus Cyber Liability Insurance

RENEWAL APPLICATION.

THIS IS AN APPLICATION FOR A CLAIMS MADE AND REPORTED POLICY. THIS APPLICATION IS NOT A BINDER.

This application for NetGuard® Plus Cyber Liability Insurance is intended to be used for the preliminary evaluation of a submission. When completed in its entirety, this application will enable the Underwriter to decide whether or not to authorize the binding of insurance. Please type or print clearly and answer all questions. If space is insufficient to answer any question fully, attach a separate sheet. Complete all required supplemental forms/applications. "You" and "Your", as used in this application, means the Applicant.

		er to trie attached Cyber Giossary for an explanation of the	ie cyber security terms that appear in bold race type.				
		NERAL INFORMATION					
Name	of	Primary Applicant:					
Business Address: Phone:							
2.	2. ADDITIONAL ENTITIES / MATERIAL CHANGES						
		f all additional entities seeking coverage under the policy. any percentage of ownership.	. Include each entity's description of operations and re	lationship to you,			
Have	you	acquired any subsidiaries, affiliated companies or entitie	es in the past 12 months?	☐ Yes ☐ No			
Has your name changed, or has any merger or consolidation taken place, in the past 12 months? If "Yes", provide details on a separate page.				☐ Yes ☐ No			
3.	WE	BSITES / DOMAINS					
		ebsites/domains owned/operated by all entities seeking o	overage.				
		NFIRMATION OF ENTITIES					
This Application is reflective of the total exposure for all entities seeking coverage, both previously existing and any acquired in the past 12 months, including revenues, records, controls, vendors and loss history.			☐ Yes ☐ No

7.	7. INTERNAL SECURITY CONTROLS				
	a.	Do you allow remote access to your network? If "Yes":			
		(1) Do you use SSL VPN (Web VPN) for remote access into your network?			
		(1) Do you use SSL VPN (web VPN) for remote access into your network? (2) Is Multi-Factor Authentication (MFA) enforced to secure all remote access to your network for all			
		employees and third parties on all applications, including VPNs (Virtual Private Network), RDP (Remote			
		Desktop Protocol), RDWeb (Remote Desktop Web) or any RMM (Remote Management and			
		Monitoring) applications?			
		If MFA is enforced, complete the following:			
		(1) Select your MFA provider: Choose an item.			
		If "Other", provide the name of your MFA provider:			
		(2) Select your MFA type: Choose an item.			
		If "Other", describe your MFA type:			
	b.	Do you use a next-generation antivirus (NGAV) product to protect all endpoints across your enterprise?	☐ Yes ☐ No		
		If "Yes", select your NGAV provider: Choose an item.			
		If "Other", provide the name of your NGAV provider:			
	C.	Do you use an endpoint detection and response (EDR) tool that includes centralized monitoring and logging			
		of all endpoint activity across your enterprise?	☐ Yes ☐ No		
		If "Yes", complete the following:			
		(1) Select your EDR provider: Choose an item.			
		If "Other", provide the name of your EDR provider:			
		(2) Is EDR deployed on 100% of endpoints?	☐ Yes ☐ No		
		If "No", please use the Additional Comments section to outline which assets do not have EDR , and whether any mitigating safeguards are in place for such assets.			
	d.	Do you require MFA to protect all local and remote access to privileged user accounts?	Yes No		
	u.	If "Yes", select your MFA type: Choose an item.			
		If "Other", describe your MFA type:			
			DV DN-		
	e.	Can your users access email through a web application or a non-corporate device?	☐ Yes ☐ No☐ Yes ☐ No		
		If "Yes", do you enforce MFA?			
	f.	Do you enforce Account Lockout policies for all users? If "Yes", provide the lockout threshold setting:	☐ Yes ☐ No		
		<u> </u>			
8.		CKUP AND RECOVERY POLICIES			
		you use a data backup solution? ′es":	☐ Yes ☐ No		
		Which best describes your data backup solution? Choose an item.			
	0.1	If "Other", describe your data backup solution:			
	b.	Check all that apply:			
		Your backups are encrypted, immutable or kept separate from your network (offline/air-gapped) .			
		You utilize MFA for both internal and external access to your backups.			
	c.	How frequently are backups run? Choose an item.			
	d.	Estimated amount of time it will take to restore essential functions using backups in the event of a widespread			
		malware or ransomware attack within your network? Choose an item.			
9.	PH	SHING CONTROLS			
	a.	Do you require all employees at your company to complete social engineering training that includes phishing			
		simulations?	Yes No		
	b.	Does your organization send and/or receive wire transfers?	☐ Yes ☐ No		
		If "Yes", does your wire transfer authorization process include the following:			
		(1) A wire request documentation form, a protocol for obtaining proper written authorization for wire transfers, and a separation of authority protocol?			
		(2) A protocol for confirming all payment or funds transfer instructions/requests from a new vendor, client or			
		customer via direct call to that vendor, client or customer using only the telephone number provided by the vendor, client or customer <u>before</u> the payment or funds transfer instruction/request was received?			
		(3) A protocol for confirming any vendor, client or customer account information change requests (including	☐ Yes ☐ No		
		requests to change bank account numbers, contact information or mailing addresses) via direct call to			
		that vendor, client or customer using only the telephone number provided by the vendor, client or	☐ Yes ☐ No		
		customer <u>before</u> the change request was received?

I HEREBY DECLARE that, after inquiry, the above statements and particulars are true and I have not suppressed or misstated any material fact, and that I agree that this application shall be the basis of the contract with the Underwriters.

CERTIFICATION, CONSENT AND SIGNATURE

The Applicant has read the foregoing and understands that completion of this application does not bind the Underwriter or the Broker to provide coverage. It is agreed, however, that this application is complete and correct to the best of the Applicant's knowledge and belief, and that all particulars which may have a bearing upon acceptability as a NetGuard® Plus Cyber Liability Insurance risk have been revealed.

By signing below, the Applicant consents to the Insurer conducting non-intrusive scans of the Applicant's internet-facing systems / applications for common vulnerabilities.

It is understood that this application shall form the basis of the contract should the Underwriter approve coverage, and should the Applicant be satisfied with the Underwriter's quotation. It is further agreed that, if in the time between submission of this application and the requested date for coverage to be effective, the Applicant becomes aware of any information which would change the answers furnished in response to any question of this application, such information shall be revealed immediately in writing to the Underwriter.

This application shall be deemed attached to and form a part of the Policy should coverage be bound.

Must be signed by an officer of the company.

California Fraud Warning

For your protection, California law requires the following to appear on this form: Any person who knowingly presents false or fraudulent information to obtain or amend insurance coverage or to make a claim for the payment of a loss is guilty of a crime and may be subject to fines and confinement in state prison.

Cyber Glossary TO ASSIST YOU IN COMPLETING YOUR APPLICATION

Please refer to the terms that apply to your specific application.

Endpoint Detection and Response (EDR) centrally collects and analyzes comprehensive endpoint data across your entire organization to provide a full picture of potential threats.

Common Providers: Carbon Black Cloud; Crowdstrike Falcon Insight; SentinelOne; Windows Defender Endpoint

Immutable backups are backup files that are fixed and unchangeable, allowing immediate deployment in the event of ransomware attacks or other data loss.

Multi-Factor Authentication (MFA) is an electronic authentication requiring two or more forms of verification, such as knowledge (e.g., password), possession (e.g., phone or key), and inherence (e.g., FaceID or hand print).

Common MFA providers for remote network access:

Okta; Duo; LastPass; OneLogin; and Auth0.

Next-Generation Anti-Virus (NGAV) is endpoint antivirus software that leverages predictive analytics driven by machine learning and artificial intelligence with threat intelligence to detect and prevent malware and fileless non-malware attacks, identify malicious behavior, and respond to new and emerging threats that previously went undetected.

Common Providers: BitDefender™; Carbon Black; CrowdStrike Falcon Prevent; SentinelOne; Sophos; Symantec

Offline/Air-gapped backup solution is a backup and recovery solution in which your data is stored offline (i.e., disconnected) and cannot be accessed. If a file or system of files has no connection to the internet or a LAN, it can't be remotely hacked or corrupted.

Personally Identifiable Information (PII) is information that can be used to determine, distinguish or trace an individual's identity, including, but is not limited to, financial account numbers, security codes, personal identification numbers (PINs), credit and debit card numbers, social security numbers, driver's license numbers, addresses, passwords, and any other non-public information as defined in the policy form.

Protected Health Information (PHI) is health-related information that can identify an individual, including demographic identifiers in medical records (names, phone numbers, emails, and biometric information like fingerprints, voiceprints, genetic information, and facial images).

Remote Desktop Protocol (RDP) is a Microsoft proprietary protocol enabling users to connect remotely to another computer via a graphical interface. The Microsoft RDP provides remote display and input capabilities over network connections for Windows-based applications running on a server.

Remote Desktop Web (RDWeb), also known as Microsoft Remote Desktop Web Access, is a service that provides remote access to corporate resources through a web portal, including remote desktop access and other applications published on the portal.

Remote Monitoring and Management (RMM) tools allow IT providers to remotely manage and monitor network environments, including remote access, patch management, and reporting functionalities.

Common Providers: ConnectWise and ManageEngine

SSL VPN (Web VPN) simplifies user authentication and network connection by allowing users to login over a webpage from any device, managed or unmanaged, without installing client software. While convenient, it is easily discoverable by threat actors

Common Providers: Fortnet, Cisco, and Palo Alto VPN Appliances

Virtual Private Network (VPN) encrypts connections between a remote device and an internal network, securing external access to internal systems.

Common Providers: Fortnet, Cisco, and Palo Alto VPN Appliances
