

PREMIER PROTECTION TABLETOP EXERCISE

Eligible insureds receive a complimentary tabletop exercise endorsed into the policy to strengthen ransomware readiness. Preparation protects your bottom line by reducing downtime, financial loss, and reputational impact. It ensures teams act decisively under pressure and uncovers gaps in security and communication before attackers can exploit them.

Eligibility

Organizations with \$250 million or more in annual revenue and cyber policies with premiums of \$50,000 or more. The exercise is designed for core incident response leaders, including executives and teams across IT/security, legal, communications, privacy, and risk.

The Result

A faster, more confident, and well-coordinated response to real cyber incidents, with clear insight into strengths, gaps, and actionable next steps to strengthen cyber readiness.

Our Approach

Through our premier partners, we deliver fast, flexible 2–3 hour virtual tabletop exercises that simulate real-world cyber incidents, such as ransomware or business email compromise. Sessions are tailored to your industry and operations and conclude with a post-exercise readout and gap analysis to drive meaningful improvement.

Be Cyber Strong® Before It Happens.

With access to our premier vendors at negotiated rates to help safeguard your network, comprehensive cyber services through CyberNET®, direct access to experienced cybersecurity consultants, and robust protection through our cyber insurance solutions, we deliver a fully integrated approach to managing today's cyber risk.
