

Cyber Security Insurance

In today's digital and connected world, cyber risks are an important and established part of the risk landscape. Companies rely heavily on IT systems to be operative, as well as to store and communicate intellectual property and data.

Concerned with continuity in the face of an event and subject to ever-tightening legislation, businesses find themselves further under pressure to be cyber-ready.

Cyber Security Insurance is an essential component of a healthy risk management strategy that looks to mitigate cyber threats appropriately. However, not all cyber policies are alike and finding the right coverage for your company can be challenging.

Cyber incidents can originate from inside or outside the company and they can be intentional or accidental. Businesses need to be prepared for a constantly widening range of cyber threats, such as data breach, ransomware attacks, industrial espionage and the introduction of virus into company systems, amongst others.

Whether targeted by hackers, political hacktivists, terrorists, nation states, competitors, disgruntled employees, or simply victims of innocent human error, all businesses are at risk.

At Tokio Marine HCC, we customise Cyber Security Insurance that offers comprehensive and innovative protection, including pre-incident prevention, crisis response and post-incident expertise.

The risk is real and the consequences of an event can be devastating: business interruption (BI), notification costs, third party claims and fines, to name a few, can result in significant financial loss.
