

# Limited Cyber Act Extension for Events

## Product overview

---

Tokio Marine HCC (TMHCC) – Specialty Group, a member of the Tokio Marine HCC group of companies, has launched a limited cyber act extension to its event cancellation product.

The extension is available through our Lloyd's syndicate and HCC International Insurance Company PLC.

## What we cover

---

### The extension provides cover for:

- Unauthorised, malicious or criminal cyber acts involving access to, processing of, use of or operation of any computer system(s) under the operational control of the insured, the venue, or any subcontractor (as defined)
- Cancellation, abandonment, curtailment, interruption, postponement, or relocation of the insured event resulting from a limited cyber act, which first occurs during the operative period
- Operative time up to 7, 14 or 30 days prior to and/or during the insured event

### We don't cover:

- Cyber acts to third party infrastructure
- Cyber war

## How is our endorsement different?

---

We will complete a free post-bind cyber scan of the insured's website to identify potential vulnerabilities, infiltrations and/or attacks. Following this, we offer advice on remedial steps to combat any issues uncovered.

We also provide 24-hour access to an incident coordinator and an IT response team.

## Target market

---

Our limited cyber act extension is only available when purchased with an event cancellation policy.

We offer insurance solutions for the sports, promotional, and entertainment sectors. We are the peace of mind and financial security behind everything from global sporting events and international exhibitions to conferences and trade shows. We also support bands, international touring artists and theatrical productions. Maximum line

The cover – up to USD 5 million per event – is available via an endorsement, rather than a separate policy to the event cancellation policy.

Simplicity sits at the heart of our new offering, which has a short questionnaire that replaces the often complex and convoluted requirements of the traditional cyber market.
